

# Apple iMac G4

The iMac G4 is a personal computer produced by Apple Inc. It was part of the iMac line of computers and was first released in 2002 and sold for \$1799. The iMac G4 was notable for its unique design, which featured a flat-panel all-in-one CRT display, mounted on an adjustable arm, attached to a hemisphere-shaped base. It featured a PowerPC G4 processor running at 733 MHz, 256 MB of RAM, and a built-in 15-inch or 17-inch CRT display. It also had a built-in CD-ROM or DVD-ROM drive, and a built-in Ethernet port for internet connectivity. It came with the Mac OS X operating system, and it was known for its sleek and innovative design and its ability to handle media-rich applications such as video editing, graphic design, and music production.
